

Session 7: Active learning from practice

INTRODUCTION

ONU Medio Ambiente -Oficina Regional de América Latina y Caribe

Elena Pita Domínguez - Oficial de Programa - Unidad de Cambio Climático

Introduction

Active learning from practice

Capacity to use the experience and lessons learned during adaptation planning and implementation to inform future adaptation efforts, including identification and promoting best practices is, required.

"Progress, experience, best practices, lessons learned, gaps, needs and support provided and received in the process to formulate and implement National Adaptation Plans" UNFCCC (2018)

Introduction

XXI Meeting of the Forum of Ministers (2018. Buenos Aires, Argentina)

Planning and monitoring adaptation

Promote the exchange of experiences and **South-South cooperation** for the identification, the development and implementation of adaptation measures and plans, based on data and climate change scenarios, using as basis, among others risk maps and other innovative tools.

Support capacity building and **exchange of experiences** in the integration of adaptation indicators at the national level to contribute to building resilience across the Latin American and Caribbean region, [...].

.

Introduction

Regional Platform on Climate Change

XX Meeting of the Forum of Ministers (2016. Cartagena, Colombia): Decision 7: Establishment of the Regional Platform for Cooperation on Climate Change,

XXI Meeting of the Forum of Ministers (2018. Buenos Aires, Argentina):

- **Strengthen** regional cooperation in the framework of the Regional Platform for Cooperation on Climate Change, through **capacity building and cooperation** among the countries of the region [...]
- **Request** donor countries,[...], such as the GEF, Euroclima + and Regatta, to increase their support to facilitate the regional implementation of the decisions of the Forum of Ministers on climate change, including activities within the framework of the Platform [...]

Introduction

What are the ingredients for successful regional knowledge sharing?

- Contents: What information?
- Public: Who is the target audience? Who produces the information?
- Processes: What are the most effective modalities?
- Technology: What tools?

Thank you
